

It's all wireless!

...about the Company.

rentevent GmbH's wireless camera department was founded in 2007.

Since then our team has gained an excellent reputation worldwide through competence and professional work.

Through careful preparation and utilization of the best technology available we ensure the success of our clients' projects.

All technical equipment is continually maintained to ensure reliable operation.

We offer the widest range of wireless video transmission systems and associated RF equipment in the German-speaking countries to suit any application.

It's all wireless!

We offer a wide range of wireless solutions to meet our customers requirements.

Wireless Cameras Systems / SD & HD

Our warehouse contains nearly the whole range of equipment by VISLINK, many specialist parts by GIGAWAVE and COBHAM.

We can provide complete wireless camera systems based on Sony, Grass Valley and Ikegami camera bodies.

Camera Control and RF Monitoring

We provide wireless camera control systems to a wide range of cameras. As well as the proven technology by VISLINK and Videosys Broadcast we designed and build our own system for special applications e. g. Antelope High Speed Camera.

Our engineers use modern, state of the art measurement apparatus to ensure the quality of the equipment we supply.

It's all wireless!

We offer a wide range of wireless solutions to meet our customers requirements.

Airborne Wireless Solution

We offer both downlink and relay equipment to be installed onboard a Helicopter and we hold the essential EASA Certification for those parts connected direct to the Helicopter for the AS350 / AS355 / Bell Jet Ranger.

Mobile Wireless Solution

We operate 3 BMW Motorbikes modified with special footrests for the cameraman and specialized electronics installation for the wireless equipment for picture transmission, camera control, GPS and Intercom. In cooperation with our flying relay solution pictures can be gathered over huge distances.

It's all wireless!

...and a lot of special equipment.

It's not only Transmitters and Receivers, we offer a wide range of associated equipment.

We are able to operate our equipment in 2 / 3 / 5 and 7 GHz range, depending on local authorities' regulations.

We have lots of special Antennas, Antenna Signal Splitters, RF-over-Fibre Systems, MPEG2 and H.264 Decoders, Remote Control Equipment, ASI Combiners, ASI Multiplexer, Transport Stream Manager, Communication Equipment, RF Filter, RF Booster, Mobile Antenna Masts and Test Equipment.

All together we own about 30 wireless systems.

With our in-house electronics workshop we are able to build special solutions to meet our customers requirements.

It's all wireless!

...some recent highlights.
